Node.js

Communications

JavaScript

Time Management

EMPLOYMENT HISTORY

Aug 2023 — Oct 2023

Software Intern, Arcturus Technologies, Inc.

- Resolved bugs in React and Node.js app, improving stability and user experience. Proposed feature enhancements and participated in code reviews.
- Researched deployment strategies, assisted in CI/CD setup, and collaborated on server optimization for smooth future application deployment.

EDUCATION

Jan 2021 — Apr 2023

Computer Programming and Analysis, George Brown College

Toronto

PROJECTS

Quote Generator | JavaScript, HTML/CSS

Deployed Link - <https://ravkeerat02.github.io/Quote-generator/>

- Implemented advanced features such as seamless Twitter sharing, enabling users to effortlessly share their favorite quotes with a single click.
- Integrating text to speech functionality, providing users with a unique and engaging way to experience the quotes.

Time Master | NodeJS, ExpressJS, HTML/CSS, EJS

Deployed Link - <https://time-master.herokuapp.com/>

- Engineered a user-centric scheduling application using NodeJS and ExpressJS, streamlining time management for employees.
- Improved team collaboration by integrating EJS for server-side rendering, optimizing the application's performance and responsiveness.

CarHub | ReactJS, JavaScript, Typescript

Deployed Link - <https://car-hub-nine-rust.vercel.app/>

- Created a feature-rich web application using ReactJS and Typescript, empowering users to seamlessly sort, filter, and search for specific cars based on year and fuel mileage.
- Displayed comprehensive information about each car, including images and detailed descriptions, providing users with valuable insights for informed decision-making.
