Objective

Aspiring Junior Front End Developer with a strong foundation in React and JavaScript, dedicated to contributing my skills and knowledge to a dynamic development team. Eager to learn, grow, and make a meaningful impact in creating exceptional web experiences.

Education

George Brown College   Toronto, Canada
Computer Programming and Analysis   *January 2021 – April 2023*

- Relevant Coursework: Database Management, Advanced Database Development, Full Stack Development, Applied Data Science, Applied Machine Learning

Integrated Montessori Centre   Manila, Philippines
Accounting Business Management   *June 2018 – June 2020*

- Relevant Coursework: Fundamentals of Accounting, Business and Management, Applied Economics, Business Finance

Experience

Software Intern, Arcturus Technologies, Inc.   August 2023 – Present

- Resolved bugs in React and Node.js app, improving stability and user experience. Proposed feature enhancements and participated in code reviews.
- Researched deployment strategies, assisted in CI/CD setup, and collaborated on server optimization for smooth future application deployment.

Projects

Quote Generator | JavaScript, HTML/CSS

- Developed a webpage application that generates quotes and allows sharing on Twitter, translation into multiple languages, and text-to-speech functionality.

Time Master Application | NodeJS, ExpressJS, HTML/CSS, EJS

- Created a user-centric application for employees to manage schedules, clock in/out, and request time off.
- Enriched functionality by implementing manager features for efficient employee management.

AI Shirt Generator | ReactJS, JavaScript
- Key features include camera rotation for 360-degree views, applying selected styles to T-shirts, and changing object colors.

CarHub | ReactJS, JavaScript, Typescript
- Created a web-based application which can be used to sort, filter and search for a specific car based on year and fuel mileage. Result will display image, detailed description about the subject.

Skills

- Proficient in JavaScript, React, and Node.js for building dynamic web applications.
- Strong focus on writing clean, efficient, and maintainable front-end code.
- Skilled in translating project requirements into user-friendly and responsive interfaces.
- Experienced in working with SOAP and REST APIs to fetch and display data.
- Effective cross-functional collaborator, ensuring seamless integration of front-end and back-end components.
- Proven ability in project planning and team management for successful front-end development.
- Detail-oriented documentation for compliance and development support.
- Excellent communication skills for stakeholder engagement and decision influence.
- Promotes a risk-aware culture while fostering a high-performance development environment.
